Canada Insists On Identity

Premier Meighan, of Canada, tartled the British government executives at the Conference of Imperial Premiers, in London, with his demand that Canada should have active and positive participation, and not merely a neutral interest, in national affairs which concerned to Dominion. His stand is described as implicate Mrs. Catherine Kaber being almost a new Declaration of Independence, a modified

Magna Charta. These four propositions were advanced by Mr. Meighan: Canada and the dominions or colonies must be fully informed-as to British policy affecting India, Mesopotamia, and the Orient; Canada and the dominions must not only be informed, but consulted, regarding international policy affecting them; treaties must be ap proved hereafter by the dominion parliaments, and, in any matter affecting the United States decision shall rest with Canada-

To The "Old-Timers"

Gather around, you Richmond 'old timers?' you fellows who HEMSTITCHING and picoting and answer a question or two. How long since you went into a store and called for a bottle of pride yourself on your memory, checks 10c extra. United Sales, "Godfrey's Cordial," or Dr. Rad-Agency, 1500 Fountain avenue, cliff's Toothache Tincture," of "Genuine Haarlem Oil." or "Le-"Genuine Haarlem Oil," or "Le-FOR RENT-Three 3-room Vine' Eye Water, or Bloom of Circassia." Quite a few years furnished or unfurnished. Call we dare say. And yet there are 156 tf many in this neighborhood to whom those names are familiar, and who recall that back several years ago, in the days of their youth, those remedies were house hold words.

But you can't find them now. At least you don't hear people calling for them and we doubt if there is a store in this section that could dig up more than one of the several named if there should be a call for it. Not that they are no longer considered good remedies-they are doubtless just as good as they ever were. But there is no demand for them, and there hasn't been

for a good many years. And the explanation is right here in a few words—you don't hear them called for because you don't see them adveritsed. As long as they were advertised they were in demand and they sold by the thousands of bottles. Today few people know anything about them, and when they want a medicine that will answer the same purpose as the old ones, they go to the store and buy something they see advertised. All of which proves conclusively that the very things the public sees advertised are the very things the public buys. You can't get away from this argument. And you can't find any better proof of the fact that advertising pays than to try to purchase something that isn't advertised.
